

BIMM MODULAR COURSE

SPORTS MEDICINE AND THE LOWER LIMB

11th – 13th September 2010

Venue: London College of Osteopathic Medicine,
Boston Place, London.

This is the practical learning accompanying Module 6 of the BIMM Modules in Musculoskeletal Medicine. The course is a general introduction to sports medicine. With reference to lower limb injury and overuse syndromes the student will learn about the wider range of diagnostic possibilities encountered in the sports medicine clinic and their management. The hip, knee, ankle and foot will be covered comprehensively in terms of anatomy, function, clinical presentations, medical and surgical management.

Places can be booked by completing and returning the form below, with payment, if you have not already done so. Send to: BIMM, PO Box 1116, Bushey, WD23 9BY
