

The British Institute of Musculoskeletal Medicine

SOFT TISSUE, JOINT EXAMINATION AND INJECTION WORKSHOPS

Course Leader:

Dr. Robin Chakraverty MSc DRCOG Dip.MS.Med MLCOM
Specialist in Musculoskeletal & Sports Medicine,
Royal Orthopaedic Hospital, Birmingham.

A one-day workshop. The concept is "learning by doing" and participants will rotate around the workstations, learning surface anatomy, indications, needle placement and safety issues. This will be an accelerated learning programme for GPs to get equipped. With a high tutor to delegate ratio (1:6), the course would be ideal for general practitioners, or hospital doctors beginning or considering a career in the field of musculoskeletal medicine. Programme attached. This is not a validation course

CPD 6 points
